

Technology-enhanced learning is facilitated by Academic Information Services (AIS) in all learning environments, both physical and virtual. AIS works collaboratively within the district governance structure to implement, sustain, and extend technologies in support of teaching and learning, including but not limited to the library, computer labs, technology-enhanced classrooms, learning-management systems, virtual applications/services, multimedia services, and user-support services.

Technology resources, policies, and procedures may be reviewed at <http://www.miracosta.edu/instruction/ais/>.
