Courses and Programs Committee: Membership and Responsibilities

Courses and Programs is a governance committee comprised of a faculty majority from a broad range of disciplines, administrators, classified staff, and a student representative. The chair is the only nonvoting member. The committee chair may form subcommittees to facilitate and expedite the tasks designated to the Courses and Programs (C&P) Committee.

The roles and responsibilities of the C&P Committee fall under two main categories: curriculum review and governance items (district policies and procedures) related to curriculum.

A. The responsibility for curriculum review (defined as all additions, modifications, or deletions of courses, certificates, or degrees managed via a curriculum management system at the college) is exclusively delegated to a standing subcommittee of C&P referred to as CPCC, the Courses and Programs Curriculum Committee. CPCC is comprised of one administrator and the following eleven faculty members:

1. The faculty chair of C&P, who votes only in the case of a tie
2. One faculty counselor
3. Two Career Technical Education (CTE) faculty members
4. One noncredit faculty member
5. Five faculty members representing each of the five subareas of general education
6. One faculty articulation officer

B. Governance items that include any and all additions, modifications, or deletions to board policies and/or administrative procedures under C&P’s jurisdiction are the responsibility of, and are acted upon by, the full C&P Committee.
The Courses and Programs Curriculum Committee (CPCC) reviews associate-degree applicable courses for their adherence to uniform standards in accordance with Title 5 §55002(a). These standards include the following areas:

A. Grading policy

B. Units (credit hours) related to number of lecture and/or laboratory hours required*

C. Intensity in terms of independent-study requirements

D. Prerequisites and corequisites

E. Basic skills requirements

F. Difficulty in terms of critical thinking and understanding and application of concepts

G. Level in terms of critical thinking, learning skills, and vocabulary

CPCC reviews non-degree-applicable credit courses for their adherence to uniform standards in accordance with Title 5 §55002(b). These standards include the following areas:

A. Grading policy

B. Units (credit hours) related to the number of lecture and/or laboratory hours required*

C. Intensity in terms of independent-study requirements

D. Prerequisites and corequisites.

* For purposes of federal financial aid eligibility, a “credit hour” shall be not less than the following:

A. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately sixteen weeks for one semester hour of credit or the equivalent amount of work over a different amount of time, or

B. At least an equivalent amount of work as required in the paragraph above for other academic activities as established by the college, including laboratory work, internships, studio work, and other academic work leading to the award of credit hours

CPCC recommends approval of noncredit courses if they treat their subject matter and use resource materials, teaching methods, and standards of attendance and achievement that the committee deems appropriate for the enrolled students (per Title 5 §55002(c) ).
Curriculum Development Procedures

Only faculty may create, modify, and delete courses and programs, which are then reviewed by a technical writer, the appropriate department chair and division dean, the articulation officer, and a technical review committee comprised, at minimum, of the C&P Committee chair, an administrator member of C&P, and the curriculum support specialist. Course and program proposals are subsequently forwarded to CPCC for review and vote.

All course and program proposals recommended for approval by CPCC are routed to the Academic Senate Council for approval, submitted to the state Chancellor’s Office, and forwarded to the Board of Trustees for approval. Credit curriculum is submitted to the board for approval once a year in the spring; noncredit curriculum may go to the board for approval in the late fall (for spring implementation) or together with the credit curriculum (spring) for implementation the following academic year.

All course and program deletions, additions, and modifications are maintained in a curriculum database and are reflected in the college catalog. All information published in the catalog is effective for the academic year beginning with the fall semester and concluding with the summer intersession.
