

## **UCSD Global Health Partnership**

- >Pathway to transfer (BA/BS)
- Connect with undergrad & graduate students
- >Attend UCSD Global Health Program events
  - "Quarterly Conversations in Global Health"
  - "Horizons in Global Health Research Symposium"

## Why Global Health?

From acute infectious pathogen outbreaks to emergent crises triggered by climate change and non-communicable disease, threats to human health are complex, multidimensional, and everpresent. Health challenges are intertwined with systemic inequities, global political-economic forces, and local sociocultural and ecological conditions. These entanglements make for truly wicked problems. As such, they require interdisciplinary approaches bringing together social, behavioral, biological, medical, and computer sciences to design innovative, effective, and equitable solutions

## **Program Benefits** and Highlights

- Open to all students & majors
- Diploma awarded
- Minimal requirements
  - Four courses all fulfill GE areas
  - No prerequisites
- Zero textbook cost sections
- Online or in-person classes
- >Program events & recognition
