

Definition

Distance education (DE) means instruction in which the instructor and student are separated by time and/or distance and interact through the assistance of technology.

Courses in which the instructional time may be conducted in part or in whole through distance education are subject to the approval procedures described below. Course sections in which the instructional time is conducted in part or in whole through distance education must follow the certification standards for instructor contact and accessibility described below.

Course Approval

Each proposed or existing course offered by distance education shall be reviewed and approved separately via an addendum to the course outline of record. Separate approval is mandatory if any portion of the classroom instruction in a course, or an entire section of a course, is designed to be provided through distance education.

The review and approval of new and existing distance education courses shall follow the curriculum approval procedures outlined in Administrative Procedure 4020, Program and Curriculum Development and in the Courses and Programs Committee (CPC) Handbook. Distance education courses shall be approved under the same conditions and criteria as all other courses, subject to the certification standards described in the following section.

Certification

When approving distance education courses, the CPC will certify the following:

- A. Course quality standards: The same standards of course quality are applied to distance education classes as are applied to traditional in-person classes.
- B. Course quality determinations: Determinations and judgments about the quality of distance education courses are made in accordance with all CPC course-approval criteria and procedures.

CCLC Update: #26, 4/15

Steering: CPC / AS

C. Regular effective contact: Each section of a course in which the instructional time is conducted in part or in whole through distance education will include regular effective contact between instructor and students and among students. By proposing a distance education course, the faculty author and department chair agree to the following specifications of instructor/student contact and contact among students.

1. Instructor-initiated interaction: In course sections in which the instructional time is conducted in part or in whole through distance education, ensuring regular effective instructor/student contact guarantees the student receives the benefit of the instructor's presence in the learning environment both as a provider of instructional information and as a facilitator of student learning.

In a face-to-face instructional format, instructors are present at each course section meeting and interact via announcements, lectures, activities, and discussions that take a variety of forms. In course sections in which the instructional time is conducted in part or in whole through distance education, instructors will regularly initiate interaction with students to assess if they are doing all of the following:

- a. Accessing and comprehending course material
- b. Participating regularly in course activities

Faculty office hours are not included as fulfilling the regular effective contact requirement and are a separate requirement. Providing students with an open-ended question forum, although appropriate, does not constitute the entirety of effective instructor-initiated interaction.

Instructor-initiated interaction will create an environment of academic integrity that discourages fraud in the form of student misrepresentation and constitutes a means for the following:

- a. Monitoring satisfactory progress, defined as earning grades consistent with a final course grade of a "C" or "Pass"
- b. Tracking student attendance
- c. Determining the last day of attendance for students who drop the course via the following methods:
 - (1) Prior to the first census date, the instructor will initiate an activity that requires student participation
 - (2) The instructor will include various robust assessments and assignments on a frequent basis throughout the semester.

2. Interaction among students: In course sections in which the instructional time is conducted in part or in whole through distance education, ensuring regular effective contact among students guarantees the student receives the benefit of peer interaction in the learning environment.

3. Frequency of interaction: Distance education classes are considered the virtual equivalent of traditional in-person classes; thus, the frequency of instructor/student and student-to-student interaction in a course section in which the instructional time is conducted in part or in whole through distance education will be at least the same as would be established in its face-to-face counterpart. At the very least, the number of instructor contact hours per week that would be available for face-to-face students will also be available, in asynchronous and/or synchronous mode, with students in the distance education format (based on the Carnegie unit). Given the nature of asynchronous instructional methodologies, contact shall be distributed in a manner that ensures regular instructor/student and student-to-student contact is maintained over the course of a week and the duration of the term and should occur as often as is appropriate for the course section.

4. Establishing expectations and managing unexpected instructor absence: An instructor- and/or department-established policy describing the frequency and timeliness of instructor-initiated contact and instructor feedback, and the expectations for student participation in student-student interaction, will be posted in the syllabus and/or other course documents made available to students when the course section officially opens each semester. This information will also refer students to the section in the college catalog on student rights and responsibilities.

During a course section in which the instructional time is conducted in part or in whole through distance education, the instructor will notify students if the instructor will be out of contact beyond what is described in the course documents as mentioned above. This notification will include when students can expect regular, effective contact to resume. If the offline time results in a lengthy absence (e.g., more than three or four instructional days, excluding holidays and weekends), the instructor will file an absence report so that a substitute instructor may be secured per college policies to assist students while the instructor is unavailable. It is the instructor's responsibility to evaluate and determine whether the length of the anticipated absence in regular, effective contact will exceed three or four instructional days (excluding holidays and weekends), and, if so, to notify the department chair and dean of the need for a substitute.

5. Quality of instructor-initiated contact: Regarding the type of contact that will exist in all MiraCosta College course sections in which the instructional time is conducted in part or in whole through distance education, instructors will use a variety of means to initiate contact with students, such as the following:

- a. Threaded discussion forums (with appropriate instructor participation)
- b. "Questions for the instructor" forums
- c. General email

- d. Weekly announcements
- e. Timely and frequent feedback for student work
- f. Instructor-prepared electronic lectures or introductions in the form of electronic lectures to any publisher-created materials (written, recorded, broadcast, etc.) that, combined with other course materials, create the virtual equivalent of the face-to-face course section.

In addition, instructors shall enable effective instructor/student interaction in course sections in which the instructional time is conducted in part or in whole through distance education by doing all of the following:

- a. Allocating sufficient hours per week for contact. This may include informing students of the option to meet on a face-to-face basis or via web conferencing or via telephone.
- b. Conducting student/instructor interaction with similar care and attention to students as that which occurs during face-to-face office hours and meetings.
- c. Responding to student emails, postings, phone calls, etc., in a timely manner.

Quality of student-to-student contact: Regarding the type of contact that will exist in all MiraCosta College course sections in which the instructional time is conducted in part or in whole through distance education, instructors will use a variety of means to enable student-to-student interaction, such as the following:

- a. Threaded discussion forums and other asynchronous interaction tools.
- b. Group projects.
- c. Peer review activities.
- d. Peer presentations.
- e. Synchronous (live) online interactions.
- f. Collaborative documents and other tools for knowledge-building and sharing.

- D. Instructor preparation: By proposing a distance education course, the faculty author, department chair, and dean agree that instructors assigned to teach a distance education course section should be prepared to teach distance education in accordance with any department and college procedures, and negotiated agreements.

- E. Accessibility: Each section of a course in which the instructional time is conducted in part or in whole through distance education will comply with all applicable accessibility requirements. By proposing a distance education course, the faculty author and department chair agree that the course will be able to meet the accessibility requirements in state and federal regulations (Americans with Disabilities Act of 1990 (ADA), section 508 of the Rehabilitation Act of 1973, California Government Code section 11135, and Title 5 section 55205).
- F. Duration of approval: All distance education courses approved under this procedure will continue to be in effect unless substantive changes are made to their official course outlines of record.

Verification of Student Identity

Consistent with federal regulations pertaining to federal financial aid eligibility, the district must authenticate or verify that the student who registers in a distance education or correspondence education course is the same student who participates in and completes the course or program and receives the academic credit. The district will provide to each student at the time of registration a statement of the process in place to protect student privacy and estimated additional student charges associated with verification of student identity, if any.

The vice president of instructional services shall ensure the institution utilizes one or more of these methods to authenticate or verify student identity:

- A. Secure login and password to enable authenticated access to MiraCosta College student information and course management systems.
- B. Proctored examinations.
- C. New or other technologies and practices that are effective in verifying student identification.

Student Support Services

The college will assure that distance learners have access to student support services that are comparable to those services provided to on-campus learners.

Accessibility

The college will assure that all institutionally provided technology resources used in support of distance education will meet the accessibility requirements in state and federal regulations (Americans with Disabilities Act of 1990 (ADA), section 508 of the Rehabilitation Act of 1973, California Government Code section 11135, and Title 5 section 55205).
